hasan\_mmsl@yahoo.com

## Objective

Seeking a junior-level software developer position in a dynamic and professional business environment where my academic knowledge and technical skills can contribute to the organization's success and where I can challenge myself and grow professionally.

## Skill Highlights

---

- .Net MVC, .NET ~ 8
- Blazor & Razor pages,
- WinForms
- JavaScript,
- React JS
- SQLServer, MongoDB, Postgress
- Entity Framework
- LINQ
- System query by PowerShell API

## Experience

---

**Internship** - 12/2023 to 05/2024

**Caironit AB**, Värmdö, Stockholm

- During my Internship period we have developed 2 softwares with my supervisor.
- Frontend developed by Windows Form AND Backend Developed by C#.
- Since It's a system query software, I have used powershell API to read system query
- PSCredential, Async, PSObject, Gif, Linq, VMware Workstation(Virtual Server)
- Project Details:
  - a) User will put IP address my software will reach that specific computer and read printer list. Any printers are installed that computer it will show the list in your computer. After getting the list user can install that printer in his computer. Noted: Computers need to be same router. Its possible to do same Real IP but need to work more.
  - b) All user unable to use color printer. Only specific top level employee may allow to use this software.

**Project works –**

- CarRacing (Random/Console)
- Grade Calculation Project (SQL/Console),
- ATM – Money virtual money transfer (Postgress/C#/Console)
- Create E-Commerce Platform (React/REST API/MongoDB/C#),
- Logging System (React/REST API/MongoDB/C#),
- List of Customer questions history (React/REST API/MongoDB/C#),
- Printer Server Tool (Windows Form/Powershell Scripts/PSAPI/C#),
- Printer MGT (Windows Form/ Powershell Scripts/PSAPI /C#/VMware WorkStation Server).
